Matric From Govt. High School Noor Pur Pakpattan in 2008

I am experienced in all aspects of software development, including object-oriented technologies, user-interface design, web mobile and development process and software version control systems. I have evaluated a wide variety of computer and software systems and confident in specifying architectures and solutions for real-world problems. I have teaching, training, organizational and management experience. I am especially familiar with Web Development, PHP, CSS, JQuery, HTML, JDBC and Web Services technology and the integration of modern web and server-side technologies, C, C++, Oracle and PL/SQL software.

I have good communication, collaboration and mentoring skills and work well in a team environment.
