PROFESSIONAL EXPERIENCE

Clinical Pharmacist

The Federal Clinic and Maternity Home, Karachi – Pakistan

Apr 2016 to date

Operational Responsibilities:

- Checking prescriptions to ensure that there are no errors and they are appropriate and safe for the individual patient.
- Providing advice on dosage of the medicines and the most appropriate form of medication, for example tablet, injection, ointment, or inhaler.

Financial:

- Providing information on expenditure on drugs.

Strategic:

- Writing guidelines for drug use within the hospital and implementing hospital regulations.

In-house Pharmacist (Continuation of academic role)

The Royal Melbourne Hospital, Melbourne - Australia

Jan 2014 to Dec 2015

(Continuation of academic placement)

Operational Responsibilities:

- Critically review of medication based prior authorization requests for approval/denial against standard criteria.
- Review new drugs in a timely manner and submit change forms as appropriate.

Clinical Responsibilities:

- Develop and revise various formularies for each line of business (commercial, Medicare, Medicaid), including sending communications, training of identified departments, updating all brochures, and submitting change forms.
- Research adequately and be properly prepared for all Committee meetings, ensuring all recommendations for both new drugs and new policies are appropriate and have been discussed with subject matter experts.
- Develop and conduct Drug Utilization Review (DUR) activities, Medication Therapy Management (MTM), and other integrated programs with medical management.
- Create, develop, maintain and enhance clinical reporting programs, including but not limited to physician specific reporting, alternative prescribing programs for utilization, assigned client plans, etc.
- Manage and evaluate therapeutic drug interventions and other clinical pharmacy programs for the purpose of controlling pharmacy trend, including member and provider interventions, and looking specifically at outcomes for these programs, as well as considering comprehensive research projects.
- Pipeline monitoring and evaluation.
- Provide innovative and applicable ideas in clinical program development, utilization management, formulary management, provider education, therapeutic substitution, MTM/DUR, and/or improvements in programs and edits that already exist, including both improving operational efficiencies, as well as developing new clinical edits. Implement these new ideas or improvements as approved, while also considering outcomes in all programs.
- Work with employer clients, account management, and sales in client and member meetings as assigned to improve the understanding of the pharmacy benefit, as well as offering recommendations.

Administrative Responsibilities:

- Maintain a solid understanding of the requirements of the Victoria Department of Health, and the National Committee for Quality Assurance, specifically as they relate to the expectations of pharmacy operations. Ensure compliance with regulatory and accreditation requirements of clinical functions.

Trainee Pharmacist***Ziauddin University Hospital, Karachi – Pakistan******Jan 2010 to Apr 2010***

It was four month training of pharmacist in hospital and clinical pharmacy setting to get acumen of pharmacy administration, dispensing, counselling, clinical rounds, and general administrative responsibilities of pharmacist.

Clerkship (Clinical and Hospital Pharmacy)***Ziauddin University Hospital (College of Pharmacy), Karachi – Pakistan******Jan 2008 to Dec 2009***

As a part of curriculum, I did, clinical and hospital pharmacy clerkship in different campuses of ZUH. This clerkship was comprised of approximately 800 hours that ran once a week (8 hours / week) for fourth and fifth year of Doctor of Pharmacy program.

In clinical pharmacy clerkship, I learned all the practical duties of a Clinical Pharmacist in the hospital including ward rounds, checking medication chart, counselling patients, resolve medication related issues etc.

In hospital pharmacy clerkship, I learned about prescription reading, dispensing, compounding, IV admixture formulation, TPN formulation, chemo preparation, store presentation, handling of controlled drugs etc.
